ALT-650 Tack-Cote
Rejuvenates and Promotes Adhesion

GENERAL: An **SS-1h** asphaltic emulsion based Tack-Cote is specially designed for prime or tack cote on any oxidized asphaltic surfaces, alligatored areas, bird baths, pot holes, or for patching and filling cracks to promote adhesion and rejuvenate asphaltic surfaces.

SURFACE PREPARATION: Surface must be dry, clean and free from all loose material, dirt and dust.

APPLICATION: Mix well before using. Tack-Cote can be applied with any suitable machine, pushbroom, mop, or squeegee. Tack-Cote will set under good conditions within 30 minutes, depending on weather conditions and coating thickness. Do not use when rain is forecast, when surface is wet or when temperature is below 50°F.

COVERAGE: Depending on type of application and job specification. For details on specific use, check with manufacturers. (For estimation purpose only: 500 Ft^2 per gallon.)

COLOR: Jet black upon drying.

CAUTION: **KEEP FROM FREEZING.** Wash tools in water. Use a paint thinner if material has dried. Do not store in direct sunlight or where temperature exceeds 100°F. Container should be closed when not in use. Keep out of the reach of children. Exterior use only.

PACKAGING: 5 gallon pails, 55 gallon drums and 275 gallon totes or bulk

Material Specifications:	Requirements:
Weight per Gallon @ 77°F, ASTM D1010, (lbs)	8.30 - 8.50
Nonvolatile %, ASTM D2939	65.0
Resistance to water, ASTM D2929	no loss of adhesion, no re-emulsification
Viscosity @ 77°F, ASTM D 562 (Kreb's Stormer Unit)	55 - 60 KU
Penetration (0.1mm), ASTM D5	50 - 80
Std. Spec. for Emulsified Asphalt	
AASHTO Designation M 140-70	Meets spec.
ASTM Desination D 977 - 77	Meets spec.
Dry Time	30 minutes
Flammability	Non-Flammable
